Abstract

Open educational resources (OER) are currently a hot topic and widely discussed around College campuses. Yet, many educators are unclear as to what constitutes OER, the value of using OER and other no-cost/low-cost instructional materials, and how to integrate these resources into their courses. This presentation will start by providing an overview of the 5R Permissions of OER (Retain, Reuse, Revise, Remix, Redistribute), discuss the spectrum of no-cost to low-cost instructional materials, and provide examples of how Community College faculty from across Illinois are utilizing these resources in their courses.

“Open Educational Resources (OER) are **teaching, learning, and research resources** that **reside in the public domain** or have been **released under an intellectual property license** that permits their **free use and re-purposing** by others.” —

[William + Flora Hewlett Foundation](#)

Retain

You can keep the work forever

Reuse

You can use the work for your own purpose

Revise

You can adapt, modify, or translate the work

The 5 R's of Open Education

WHAT IS AN OPEN EDUCATIONAL RESOURCE (OER)?

"For Free and Without Requesting Permissions"

Remix

You can combine it with another resource to make a new work

Redistribute

You can share the work with others

Creative Commons and its relationship with OER

- The Tag line for CC is: share, reuse, and remix, legally
- Provide a critical infrastructure service
- CC was founded in 2001 to support the OER initiative
- The aim is to have people provide their creative works to the public domain or retain their copyright while licensing them for certain uses, on certain conditions
- The work of CC spans from open education to open science

[You can get involved with the CC projects](https://creativecommons.org/about/program-areas/education-oer/)

OER

Not OER

How do you check licensing?

- Search the website for Licensing or Creative Commons information
- Look at the specific item to see if anything is noted
- Do a Google search for the name of the site and “Creative Commons”

[CC Logo downloads for your own uses](https://creativecommons.org/about/downloads/)

(<https://creativecommons.org/about/downloads/>)

Values of Using OER

- Support faculty choice and development of course materials
- Introduce new alternatives for effective teaching
- Encourage inter-institutional collaboration
- Encourage content sharing among colleges
- Alleviate student financial burden as it relates to textbook costs
- Increase student access to course materials
- Offer variety in formats of course content to accommodate learning styles
- Improve student success, persistence and completion

ILCCO OER Survey

OER in Illinois Community Colleges

Survey was done in Nov-Dec 2017

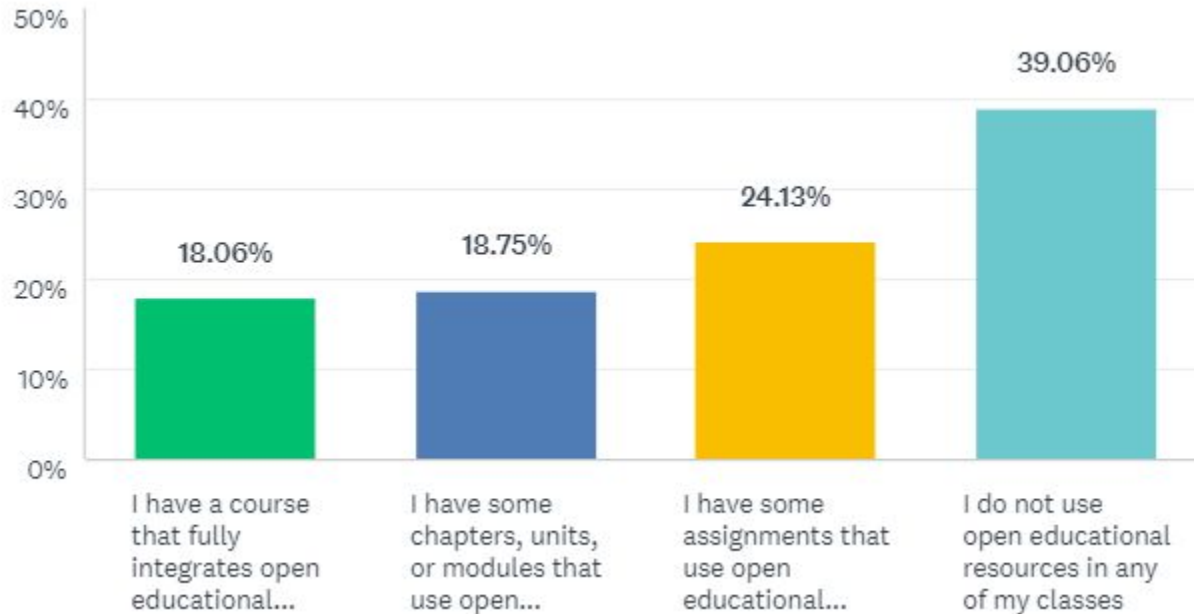

N = 576, Faculty from 24 different IL Community Colleges from around the state participated

A wide variety of disciplines were represented:

Mathematics	12%
Natural Sciences	7%
Physical Sciences	9%
Social Sciences	11%
English, Humanities, Comm & FA	27%
Career & Technical	14%
Business	4%
Computer Sci, Electronics & Tech	7%
Other	9%

Think about your course with the greatest use of open educational resources. How would you describe your level of OER usage in that course?

Why do faculty use OER?

- **Enrich, enhance, and supplement** learning materials because OER offer easy **access** and **flexibility**, more **variety**, and more **options** for students than traditional materials. (44%)
- Reduce **financial burdens** on students. (36%)
- Resources are **up-to-date**, of **good quality**, **authentic**, and **customizable**. (32%)

“OER allows me to customize my teaching materials to the course and to be flexible in my selection of timely topics to use as examples of sources in my writing course. And, OER is free to students.”

“I use OER in my courses to supplement the textbook and connect the students to real world situations.”

**“Textbook costs are high and there is no
“perfect” textbook for the course.
Besides, using OER allows the course to
grow with changes in technology and I
am not committed to a textbook.”**

Additional reasons...

- Required study material
- Not reinvent the wheel
- Promote advocacy for free information
- Train students to use technology
- Improve student success
- Improve equity
- So that teachers can share
- Avoid hassle of working with the bookstore

Transitioning a course to OER

A decorative graphic in the top right corner consisting of several overlapping circles of varying sizes and shades of teal. The largest circle is semi-transparent and contains a smaller, solid teal circle. Other smaller circles are scattered around it, some overlapping each other.

Transitioning a course to OER

- Discussed converting *Computer Applications in Business* course to OER due to cost of textbook and frequency of technology updates
- **OERCommons.org**: Computer Fundamentals course that provided 85% of material needed
 - All videos in the course were from [GCFlearnfree.org](https://www.gcflearnfree.org)
 - Creative Commons license BY NC; provided attribution to Linn-Benton Community College on the **Course Information** page in Canvas
 - Canvas course settings allow for you to choose Creative Commons license options
- Both part-time faculty currently teaching this course feel that OER was the right move

Why don't faculty use OER?

A decorative graphic in the top right corner consisting of several overlapping circles of varying sizes and shades of teal. The largest circle is semi-transparent and contains a smaller, solid teal circle. Other smaller circles are scattered around it, some overlapping the larger one.

Why don't you use open educational resources in your courses?

“I have not taken the time to evaluate them, and I’m not sure where to go to find them.”

“I have not looked into the available resources yet and I’m therefore uncertain of their quality. Also, my limited time makes it hard for me to write the necessary new assignments that adoption of new resources would entail in addition to vetting the resources.”

“It is too time consuming to find resources for 6 different classes. Almost everything that is essential is provided by textbook companies in a complete & vetted package. While I love teaching & using innovative approaches to teaching, I do not want to spend hour upon hour researching materials already available.”

“I have not been able to find OER sources that offer hard copies and the online adaptive learning materials I want. But I have not really had time to look. I do not like online textbooks, and so always want to have books that have hard copies available.”

“I haven't been able to find any that would work for my classes and I don't have much time to look for them.”

What can your College do to support your use of OER?

How to support OER usage

- Access to database by course/subject
- Hold training sessions/workshops
- Provide release time for Instructors
- Provide assistance (Library - LibGuides)
- Collaboration with other faculty
- Sharing mindset

So, how do you know if
it's OER??

What OER resource websites have you found most helpful?

Distinction between “free” and OER

YouTube--Some yes, some no (Many are standard YouTube license)

How to find creative commons YouTube: <https://www.youtube.com/watch?v=j90GO4djReA>

Khan Academy--Some yes, some no

TED Talks--You can use most, but can't adapt

Websites--Use caution! Look for that CC license! (or do a Creative Commons search)

Government websites--public domain

MAKING THE TRANSITION TO OPEN: THE EASY WAY TO
CREATE, LICENSE, AND SHARE FREE MATERIALS

- Accurately define and identify Open Educational Resources (OER).
- Describe the six Creative Commons licenses.
- Demonstrate appropriate attribution.
- Design a plan for incorporating OER materials in a class, curriculum, or college.
- Design a plan for creating OER materials and how to appropriately license open materials.
- Determine how to gain permission to use a copyrighted work in an open resource.

**(HE/K12) Making the
Transition to Open: The
Easy Way to Create...**

Faculty in any discipline will be initiated into the mysteries of open educational resources (OER): what they are, where to find them, and how to use and share them.

Introduction to Open Educational Resource (OER) Course

This is a series of 4 workshops that will help you find and identify Free and Open Resources for your classes. We will also discuss Open Licensing, Open Pedagogy, Accessibility, and curation of resources. Workshops are **Fridays (3/9, 4/6, 4/13, 5/4) from 12 – 2 PM PT**. Join us [online via Zoom](#). By completing all 4 workshops and some homework, you can earn an [“Introduction to OER” Certificate](#).

“Introduction to OER” offered by Butte College. This is meant for folks just starting the journey into OER or thinking about it. Below is a bit more information. There’s no cost or need to pre-register. Anyone is welcome to join us at the times listed by going to the Zoom link.

Email Suzanne Wakim for more information. wakimsu@butte.edu
